

Sharon Winkler

Sharon is a Registered Osteopath practising in Hatfield, Hertfordshire. She qualified as an osteopath in 1999 and worked initially in the field of human medicine, one of her specialisations being the treatment of babies and children. It was the acquisition of her first dog in 2004 which fuelled her interest in small animals and motivated her to pursue further study in this field.

In 2006 she started her small animal practice at the Bishops Veterinary Surgery in Hatfield where she sees mostly dogs and cats. She is also a tutor for the Society of Osteopaths for Animal Practice (SOAP) and lectures to qualified osteopaths who are training in the osteopathic treatment of small animals.
